# Introduction

*“...he was conscious of a grave and sweet desire to make the child's life a successful one, -- to bring out what was in her own mind and capacity, and so to wisely educate her, to give her a place to work in, and wisdom to work with, so far as he could; for he knew better than most men that it is the people who can do nothing who find nothing to do, and the secret of happiness in this world is not only to be useful, but to be forever elevating one's uses.”*

– Sarah Orne Jewett, *A Country Doctor*

*Photo by Kathy VanGorder*

If there is one truth revealed by the trends we've seen in children's health and well-being since the publication of the first Maine KIDS COUNT Data Book in 1994, it is that wise budget decisions pay off for children and families every day. In Maine, we have a history of common sense solutions that have helped children and families climb the ladder of opportunity.

During the past decade, Maine policymakers have extended MaineCare benefits to more low-income children and their families. Resources have been allocated to address teen pregnancy, prenatal care and immunizations. Insurers who do business in Maine must offer benefits for mental illness that are equivalent to the benefits offered for physical illness. Tens of thousands of citizens depend on the Maine Resident's Property Tax Relief program. What is remarkable is that these commitments have been sustained despite state budget shortfalls. The beneficial effects of these commitments on the lives of children are not only evident in the data trends reported here, but are supported by decades of research showing substantial, positive outcomes for children when they and their families have access to health care, mental health care, and more secure income.

Investing in our children as a matter of public policy must remain a priority. Despite declining poverty, more than one-

third of Maine families struggle to make ends meet --we have rising unemployment and fewer livable-wage jobs. Too many children and families with special needs do not consistently receive the care they require. The data strongly indicate that economically fair and socially just economic policy has a direct effect on the well-being of children and their families. Healthy, educated, well-adjusted, productive people are the source of and the reason for economic development in our communities.

As a community, we must become involved in making children a priority. A growing body of research confirms that spending on early education and prevention programs not only dramatically improves children's health and development, but also reduces the need for considerable state spending later on expensive interventions. Investment today by policymakers on behalf of children is not only socially wise, but fiscally sound.

Lynn Davey  
KIDS COUNT Director

# What is Maine Kids Count?

Maine KIDS COUNT, a project of the Maine Children's Alliance, is part of the national KIDS COUNT network, a state-by-state effort funded by the Annie E. Casey Foundation to track the status of children across the United States. The principal activity of KIDS COUNT is the publication of the Data Book, which provides the most up-to-date data on the social, economic, physical and educational well-being of children in Maine. Through the publication of the annual data book, we seek to 1) increase public awareness of the status of children across the state, and 2) enrich discussions concerning ways to secure better futures for all of Maine's children.

The indicators reported in the Data Book have all met the following criteria for inclusion:

- the indicator must be from a reliable source
- the indicator must be available and consistent over time
- the indicator must be easily understandable to the public
- the indicator must reflect an important outcome or measure of children's well-being
- the indicators, as a group, should represent children of all ages

## How to Use This Book

In order to both assess our present standing and evaluate our progress over time, it is essential to understand what is being measured and how. The DEFINITIONS AND SOURCES section, in the back of the book, provides a comprehensive definition of each indicator, an explanation of how and by whom it is collected and measured, as well as web addresses with direct links to data and data sources.

For every indicator in the book, we report a number and a percentage or rate. We certainly like to know the number of children represented by any indicator. It is essential to present the indicators as percents or rates in order to enable comparison between groups of different population size (i.e. different counties).

### CALCULATING RATES

Percentages and rates are measures of the probability of an event. They both take into account the total population of children who could experience that event. Rates that include a “%” sign are percents, or rates per 100 events. Other rates are expressed per 1,000, 10,000, or 100,000 events. The generic formula for calculating rates or percents is:

$$\frac{(\text{number of occurrences}) \times (\text{base rate})}{\text{population}}$$

There are 37,139 students in Maine with disabilities; that translates to a rate of 168 students with disabilities per 1,000. That rate was calculated as follows:

$$\frac{(37,139 \text{ students with disabilities}) \times (1000)}{221,195 \text{ students in Maine schools}} = 168$$

We could also report that as 16.8% of all Maine students (the rate per 100 students).

Photo by Kathy VanGorder

# Indicators at a Glance

## MEASURES NEEDING IMMEDIATE ATTENTION:

### *Economic climate:*

100,000 children in Maine live in low-income families; that is 37% of all Maine children.

A full-time minimum wage job pays well under half of a livable wage income in Maine.

Maine saw a 10% increase in **unemployment** between 2001 and 2002.

### *Children's mental health:*

Hospitalizations of children for mental health/substance abuse diagnoses increased 12% between 2001 and 2002. Depression and related mood disorders remained the number one reason children age 6-17 are hospitalized in Maine.

*Photo by Stephen Boody*

## MEASURES SHOWING IMPROVEMENT:

### *Adolescent risk behaviors:*

Substance use is declining: alcohol, marijuana, and cigarette use are all declining among Maine high school students, according to the latest Youth Risk Behavior Surveillance.

Sexual risk behavior is declining: Fewer high school students in Maine report sexual intercourse than the national average; and increasing numbers of sexually-active high school students report condom use; further, 88% report having been taught about AIDS/HIV in school.

### *Teen pregnancy rate:*

Maine has experienced a 45% decline in teen pregnancies between 1990 and 2001.

### *Immediate transition to College:*

In 2002, 68.6% of Maine high school graduates were enrolled or planned to enroll in post-secondary education the fall after graduation. This surpassed the national average of high school students immediately transitioning to college, which was 61.7% in 2001.

## MEASURES SHOWING MIXED PROGRESS:

### *Child poverty:*

Child poverty is declining, but the number of children in low-income families is increasing; TANF and Food Stamps caseloads are increasing as well, and 33% of Maine children receive subsidized school lunch.

### *Child health insurance:*

An estimated 21,000 Maine children age 0-18 are uninsured; 90% of these children have working parents. 11,000 of Maine's uninsured children are eligible for MaineCare; 10,000 are not eligible for MaineCare because their family's income is greater than 200% of poverty (the income eligibility limit).

# Physical and Mental Health

Photo by Kathy VanGorder

**FACT** 53% of Maine's uninsured children age 0-18 (11,000) are eligible for MaineCare

## CHILD HEALTH / HEALTH INSURANCE

Children age 0-17 without health insurance, 2000-2002 annual avg.

Low-income uninsured children, 2000-2002 annual avg. (as % of all uninsured)

Immunizations of children age 19-35 months, 2002

TOTAL Recipients of WIC benefits, 2003

Women

Infants and Children (as % of all children under age 5)

# Definitions and Sources of Data

## PHYSICAL AND MENTAL HEALTH

### Child Health Insurance

#### Children participating in MaineCare, SFY 2003.

The estimated number of individual children age 0-17 eligible for MaineCare during state fiscal year 2003. Data are reported by the child's county of residence at the time eligibility was determined.

Source: Maine Department of Human Services, Bureau of Medical Services.

#### Children without health insurance, 2000-2002 annual average

The estimated number and percent of related children age 0-17 who are not covered by any kind of public or private health insurance. Related children include a household head's children by birth, marriage or adoption, as well as any other person age 0-17, such as nieces or nephews, who are related to the household head. Three-year average (2000-2002).

Source: U.S. Census Bureau, Current Population Survey (March supplement), 2001 through 2003.

#### Low-income uninsured children, 2000-2002 annual average

The number of children age 0-17 who live in families with incomes less than twice the federal poverty threshold (< 200% of poverty) who lack health insurance. The rate is calculated as a percent of all uninsured children

Source: U.S. Census Bureau, Current Population Survey (March supplement), 2001 through 2003.

### Child Health

#### Immunizations, 2002

Data are from the National Immunization Survey, conducted by the Centers for Disease Control and Prevention. These data represent estimated vaccination coverage of children age 19-35 months with the 4:3:1 Series; that is, 4 doses of DTP (Diphtheria-Tetanus-Pertussis) vaccine, 3 doses of Poliovirus vaccine, and 1 dose of MMR (Measles-Mumps-Rubella) vaccine.

Source: Centers for Disease Control and Prevention, National Immunization Survey, 2002. <http://www.cdc.gov/nip/coverage/NIS/figures/02/02-431-txt.htm>

#### Individuals with Disabilities

See EDUCATION AND LEARNING section, "Special Education."

#### Live births for which prenatal care began in the first trimester, 2001

Number of live births in 2001 for which the mother began receiving prenatal care during the first three months of pregnancy; as a percent of all live births.

Source: Maine Department of Human Services, Office of Data, Research and Vital Statistics; 2001 national rate from Centers for Disease Control, National Center for Health Statistics "Births: Final data for 2001." National vital statistics reports; vol. 51, no. 2. <http://www.cdc.gov/nchs/births.htm>

#### Low birthweight infants, 2001

Live births occurring in calendar year 2001 in which the newborn weighed less than 2500 grams, (5.5 pounds); as a percent of total live births.

Source: Maine Department of Human Services, Office of Data, Research and Vital Statistics; 2001 national rate from Centers for Disease Control, National Center for Health Statistics "Births: Final data for 2001." National vital statistics reports; vol. 51, no. 2. <http://www.cdc.gov/nchs/births.htm>

#### Teen Pregnancy data

See SOCIAL AND ECONOMIC STATUS, "Teen Pregnancy."

#### WIC Benefits, 2003

Number of individuals receiving WIC (Women's, Infant's, Children's Supplemental Nutrition Program) benefits during calendar year 2003. WIC provides specific nutritious foods and nutrition education to low income pregnant and breast feeding women, infants, and children up to age five. Recipients must be at or below 185% of poverty and be at medical or nutritional risk.

Source: Maine Department of Human Services, WIC Program, special data run

### Child Welfare

#### Children in Department of Human Services care or custody, as of December 2003

Children ordered into Department of Human Services custody as a result of a child protection hearing where the child is found to be in jeopardy, a juvenile hearing where it would be contrary to the child's health and welfare to remain in the care or custody of his parents, or a divorce and/or custody hearing where neither parent has been found able to provide a home in the best interest of the child. Count as of December, 2003; rate per 1,000 children age 0-17.

Source: Maine Department of Human Services, Bureau of Child and Family Services.

#### Requests for child abuse and neglect services, 2002

Any written or verbal requests made during calendar year 2002 for Child Protective Services intervention in a family situation on behalf of a child in order to assess or resolve problems being presented. Cases were screened out when evidence of serious family problems or dysfunction was evident but the situation did not contain an allegation of abuse or neglect. Cases deemed appropriate for referral meet the standards contained in 22 M.R.S.A., 4002 as defined under the definition for substantiated child abuse and neglect victims. Appropriate referrals not assigned due to lack of resources represent referrals that warrant Child Protective Services intervention but are not assigned because the office has reached the upper limits of its capacity to investigate and assess.

Source: Maine Department of Human Services, Bureau of Child and Family Services, Child Protective Services.

#### Substantiated child abuse and neglect victims, 2002

The number of individual victims of child abuse and neglect in calendar year 2002 for whom assessment led to a finding of a threat to a child's health or welfare by physical, mental or emotional injury or impairment, sexual abuse or exploitation, deprivation of essential needs or lack of protection from these by a person responsible for the child (22 M.R.S.A., 4002). Rate per 1,000 children age 0-17.

Source: Maine Department of Human Services, Bureau of Child and Family Services, Child Protective Services.

## Mortality

### **Child and teen suicides, 1997-2001 annual average**

Suicides of children age 10-19. Data are reported by the child's place of residence, not the place of death. Five-year annual average (1997-2001); rate per 10,000 children age 10-19.

Source: *Special tabulations by the Maine Department of Human Services, Office of Data, Research and Vital Statistics; 2000 National rate from Centers for Disease Control, Wonder System, Mortality Query Results for ICD-10 codes X60-X84; children age 10-14, 15-19.*

### **Child deaths, 1997-2001 annual average**

Deaths from all causes to children from age 1-14. The data are reported by the child's place of residence, not the place of death. Five-year annual average (1997-2001); rate per 10,000 children age 1-14.

Source: *Special tabulations by the Maine Department of Human Services, Office of Data, Research and Vital Statistics. 2001 National rate from Centers for Disease Control, National Center for Health Statistics, the National Vital Statistics Report, vol. 52, no. 3. Deaths: Final Data for 2001. Table 3, p. 21.* [http://www.cdc.gov/nchs/data/nvsr/nvsr52/nvsr52\\_03.pdf](http://www.cdc.gov/nchs/data/nvsr/nvsr52/nvsr52_03.pdf)

### **Infant mortality, 1997-2001 annual average**

Deaths of infants under 1 year of age in comparison to live births occurring during the same time period. The data are reported by place of residence, not place of death. Five-year average (1997-2001); rate per 1,000 live births.

Source: *Maine Department of Human Services, Office of Data, Research and Vital Statistics; 2001 national rate from Centers for Disease Control, National Center for Health Statistics, the National Vital Statistics Report, vol. 52, no. 3. Deaths: Final Data for 2001. Table 3, p. 21.* [http://www.cdc.gov/nchs/data/nvsr/nvsr52/nvsr52\\_03.pdf](http://www.cdc.gov/nchs/data/nvsr/nvsr52/nvsr52_03.pdf)

### **Teen deaths, 1997-2001 annual average**

The number of deaths from all causes to children age 15-19. The data are reported by the child's place of residence, not the place of death. Five-year average (1997-2001); rate per 10,000 children age 15-19.

Source: *Special tabulations by the Maine Department of Human Services, Office of Data, Research and Vital Statistics; 2001 National rate from Centers for Disease Control, National Center for Health Statistics, the National Vital Statistics Report, vol. 52, no. 3. Deaths: Final Data for 2001. Table 3, p. 21.* [http://www.cdc.gov/nchs/data/nvsr/nvsr52/nvsr52\\_03.pdf](http://www.cdc.gov/nchs/data/nvsr/nvsr52/nvsr52_03.pdf)

### **Teen violent deaths, 1997-2001 annual average**

Deaths caused by homicide, suicide and accidents to children age 15-19. The data are reported by the child's place of residence, not the place where the death occurred. Five-year average (1997-2001); rate per 10,000 children age 15-19.

Source: *Special tabulations, Maine Department of Human Services, Office of Data, Research and Vital Statistics; 2000 national rate from Annie E. Casey Foundation, Kids Count Data Book: State Profiles of Child Well-Being, 2003.* <http://www.aecf.org/kidscount/databook/>

## Mental Health

### **Inpatient hospitalizations for attempted suicide, 2002**

Number of inpatient hospital discharges of children age 0-19 with a principal diagnosis of an injury, and an E Code categorizing the cause of injury as suicide/self-inflicted (E950.0 – E959). Rate per 1,000 children age 0-19.

Source: *Maine Health Data Organization, special data run.*

### **Inpatient hospitalizations for mental health or substance abuse diagnoses, 2002**

Number of inpatient hospital discharges of children age 0-19 with a principal diagnosis of mental disease/disorder (MDC 19), alcohol/drug use or alcohol/drug induced organic mental disorders (MDC 20). These data count hospitalizations, not individual children. Rate per 1,000 children age 0-19.

Source: *Maine Health Data Organization, special data run.*

### **Outpatient hospital visits for attempted suicide, 2001**

Number of outpatient hospital visits of children age 0-19 with a principal diagnosis of an injury, and an E Code categorizing the cause of injury as suicide/self-inflicted (E950.0 – E959). Rate per 1,000 children age 0-19.

Source: *Maine Health Data Organization, special data run.*

### **Outpatient hospital visits for mental health or substance abuse diagnoses, 2001**

Number of outpatient hospital visits of children age 0-19 with a principal diagnosis of mental disease/disorder; alcohol/drug use or alcohol/drug induced organic mental disorders. These data count hospital visits, not individual children. Rate per 1,000 children age 0-19.

Source: *Maine Health Data Organization, special data run.*

## Adolescent Health and Safety

### **Adolescents age 15-19 served in the Maine family planning system, FY 2003**

The total number of adolescents age 15-19 served in state fiscal year 2003. Data are reported by gender; and as a percent of all adolescents age 15-19.

Source: *Family Planning Association of Maine; Region I Title X Data System, U2 User Summary by Gender, Table A, Data Run 11/24/2003*

### **Children and adolescents using services of licensed alcohol and drug abuse treatment providers, 2002**

The total number of individual children age 0-14 and 15-19 using services provided by Maine alcohol and drug abuse treatment. These data represent total clients, and include clients with substance abuse, affected others (such as children of parents with substance abuse problems requiring therapy), and clients in for evaluation only.

Source: *Treatment Data System (TDS), Office of Substance Abuse, Maine Department of Behavioral and Developmental Services.*

### **Children in motor vehicle crashes with personal injury, 2002**

Number of children age 0-19 in motor vehicle crashes with personal injury, as a percent of all crashes involving children.

Source: *Department of Human Services, Bureau of Health, Maine Injury Prevention Program.*

### **Chlamydia cases, 2002**

Reported cases of chlamydia among Maine children and adolescents age 10-19; rate per 1,000 children age 10-19.

Source: *Maine Department of Human Services, Bureau of Health, HIV/STD Program.*

### **Gonorrhea cases, 2002**

Reported cases of gonorrhea among Maine children and adolescents age 10-19; rate per 1,000 children age 10-19.

Source: *Maine Department of Human Services, Bureau of Health, HIV/STD Program*

### **OUI Arrests, License Suspensions and Convictions, 2002**

Arrests represent implied consent statistics from the Bureau of Motor Vehicles; numbers represent drivers under age 20 who took or refused to take a blood alcohol test. License suspensions are broken into administrative suspensions, issued by the Bureau of Motor Vehicles, and suspensions issued by the courts. Convictions represent those drivers under age 20 convicted for Operating Under the Influence. All data are from calendar year 2002. Population numbers used to compute rates are the population of drivers under age 20.

Source: Department of the Secretary of State, Bureau of Motor Vehicles. Some data are available online at: <http://www.state.me.us/sos/bmv/stats/statistics01.htm>

### **Youth Risk Behavior Surveillance data, 2003:**

Source: Maine Department of Education, Bureau of Instruction, 2003 Maine Youth Risk Behavior Survey Report. 2001 National rates from the Youth Risk Behavior Surveillance - Centers for Disease Control. <http://www.cdc.gov/>

### **Estimated livable wage for a single-parent family of three, 2002**

The estimated hourly wage required to meet basic expenses for a single parent, three-person family in 2002. Data are reported by county. A Livable wage is calculated by dividing the total expenses in a basic needs budget by the number of hours that make up a year of full-time work.

Source: Maine Center for Economic Policy: *Getting By: Maine Livable Wages in 2002.* (July 2003).

### **Median household income, 2000**

Estimated median household income by county in Maine. These estimates are modeled from combined census estimates, current population surveys (CPS), and other administrative and economic data. The median income is the dollar amount which divides the income distribution into two equal groups - half with income above the median and half with income below it.

Source: U.S. Census Bureau, *Small Area Income and Poverty Estimates, 2001*; data represent income from previous year. <http://www.census.gov/hhes/www/saipe/stcty/estimate.html>

### **Unemployment rate, 2002**

Percentage is the average number of people in the civilian labor force, divided by the average number of unemployed people.

Source: Maine Department of Labor, Bureau of Employment Security, Division of Labor Market Information Services, *Local Area Unemployment Statistics Program (LAUS), Civilian Labor Force for Maine and Counties, 2002.*

<http://www.maine.gov/labor/lmis/data/laus/mecty02.html> National data referenced are from the Bureau of Labor Statistics, *Local Area Unemployment Statistics Program (LAUS), Table 1: Employment status of the civilian noninstitutional population 16 years of age and over by region, division, and state, 2001-2002 annual average.* <http://stats.bls.gov/news.release/srgune.t01.htm>

## **SOCIAL AND ECONOMIC STATUS**

### **Income**

#### **Children in homeless or emergency shelters, July, 2003**

Individual children age 0-17 staying in one of Maine's homeless or emergency shelters with or without other family members. This number may include children whose primary residence is out of state. It is also important to note that not all of the state's homeless or emergency shelters admit children. Rate per 1,000 children age 0-17.

Source: Maine State Housing Authority.

#### **Children in low-income families, 2000-2002 annual average**

The estimated number and percentage of children age 0-17 who live in families with incomes less than twice the federal poverty threshold (< 200% of poverty). In 2001, the midpoint of the 3-year average, the poverty threshold for a typical family of three was \$14,128. Thus, "low-income" represents income of less than \$28,256 for a family of three.

Source: U.S. Census Bureau, *Current Population Survey (March supplement), 2001 through 2003*; data reflect income from the prior year. Special runs by Annie E. Casey Foundation for national KIDS COUNT network.

#### **Children in poverty, 2000**

The estimated number and percent of children age 0-17 for whom poverty is determined. Poverty status is not determined for people in institutions, in military group quarters, in college dormitories, and unrelated individuals under 15 years old. Data are reported by county. In 2000, the poverty threshold for a typical family of three was \$13,738.

Source: U.S. Census Bureau, *Small Area Income and Poverty Estimates, 2001*; data represent income from previous year. <http://www.census.gov/hhes/www/saipe/stcty/estimate.html>

#### **Children under age 5 in poverty, 2000**

The estimated number and percent of children under age 5 for whom poverty is determined. Poverty status is not determined for people in institutions, in military group quarters, in college dormitories and unrelated individuals under 15 years old. In 2000, the poverty threshold for a typical family of three persons was \$13,738.

Source: U.S. Census Bureau, *Small Area Income and Poverty Estimates, 2001*; data represent income from previous year. <http://www.census.gov/hhes/www/saipe/stcty/estimate.html>

### **Income Supports**

#### **Children receiving Food Stamps, December 2003**

Total number of children age 0-17 who were receiving Food Stamp benefits in December 2003. NOTE: 2003 KIDS COUNT Data Book reported those who received Food Stamps ONLY, which was an error. Calculation should have included those designated as receiving Food Stamps and TANF; the total state number for December 2002 of children receiving Food Stamps was 45,224, not 26,485 as noted.

Source: Maine Department of Human Services, Bureau of Family Independence; Report: *Geographic Distribution of Programs and Benefits, Special Run, December 2003.*

#### **Children receiving TANF, December 2003**

The total number of children age 0-17 who were receiving Temporary Aid to Needy Families in December 2003.

Source: Maine Department of Human Services, Bureau of Family Independence; Report: *Geographic Distribution of Programs and Benefits, Special Run, December 2003.*

#### **Children participating in MaineCare**

See PHYSICAL AND MENTAL HEALTH section, under "Health Insurance."

#### **Children receiving Subsidized School Lunch**

See EDUCATION AND LEARNING section.

#### **Children served through child care subsidies**

See EDUCATION AND LEARNING section, "Child Care and Head Start."

### Child support enforcement, cases with collection, FY 2002

The number of families with children for which the state child support enforcement agency successfully collected child support payments due, as a percent of the total number of families on the agency's caseload during fiscal year 2002.

Source: U.S. Department of Health and Human Services, Administration for Children and Families, Office of Child Support Enforcement. *Child Support Enforcement Fiscal Year 2002 Data Preview Report: Table 5 - Statistical Program Status, FY 2002.*

[http://www.acf.dhhs.gov/programs/cse/pubs/2003/reports/prelim\\_datareport/table\\_5.html](http://www.acf.dhhs.gov/programs/cse/pubs/2003/reports/prelim_datareport/table_5.html)

### Families headed by mothers receiving child support or alimony, 1999-2001

The estimated percentage of families headed by a woman with no spouse present and with one or more own children age 0-17 receiving either child support or alimony payments during the previous calendar year. Includes those receiving partial payment as well as those receiving full payment. There may be no child support award in place for many of these families. Own children include the family head's children by birth, marriage or adoption. Three-year average (1999-2001).

Source: Population Reference Bureau analysis of data from the U.S. Census Bureau, *Current Population Survey (March supplement), 2000 through 2002, as published in the Annie E. Casey Foundation, Kids Count Data Book: State Profiles of Child Well-being, 2003.*

### State TANF and Food Stamp maximum benefit level as a percent of the Federal Poverty Level, 2003

The percent of the 2003 Federal Poverty Guideline for a one-parent family of three persons (one parent, two children) covered by current-year state TANF (Temporary Aid to Needy Families) and Food Stamp Benefits. For a family of three, the 2003 Federal Poverty Guideline was \$15,260, or \$1,271/month. In Maine, the TANF maximum monthly grant for a family of three is \$485. Therefore, the TANF maximum is 38% of the federal poverty guideline. A family of three receiving \$485 in TANF benefits would receive a maximum monthly Food Stamp benefit of \$366. The combined benefit of \$851 is 68% of the Federal Poverty Guideline for a family of three.

Source: Maine Department of Human Services, Bureau of Family Independence; *Poverty Guidelines provided in the Federal Register, Vol. 68, No. 26, February 7, 2003, pp. 6456-6458.*

<http://aspe.hhs.gov/poverty/03poverty.htm>

## Crime

### Arrests of children, 2002

The annual arrest data count all arrests of youth for offenses during calendar year 2002, including repeated offenses by the same individual. Rate per 1,000 children age 10-17.

Source: Maine Department of Public Safety, *Uniform Crime Reports, 2002.*  
[http://www.state.me.us/dps/cim/crime\\_in\\_maine/cim.htm](http://www.state.me.us/dps/cim/crime_in_maine/cim.htm)

### Arrests of children for crimes against persons, 2002

Total number of arrests of children age 10-17 for crimes against persons including: murder and non-negligent manslaughter; forcible rape, robbery, and aggravated assault; does not include other assaults. The annual arrest data count all arrests of youth for crimes against persons during calendar year 2002, including repeated offenses by the same individual. Rate per 1,000 children age 10-17.

Source: Maine Department of Public Safety, *Uniform Crime Reports, 2002.*  
[http://www.state.me.us/dps/cim/crime\\_in\\_maine/cim.htm](http://www.state.me.us/dps/cim/crime_in_maine/cim.htm)

### Domestic assaults reported to police, 2002

Rate per 100,000 population. Assaults reported to the police which were perpetrated by family or household members who are or were married or living together in a romantic relationship, natural parents of the same child (whether or not the couple ever lived together) or other adult family members related by blood or marriage. These are not unduplicated counts, and may include numerous assaults affecting the same individuals.

Source: Maine Department of Public Safety, *Uniform Crime Reports, 2002.*  
[http://www.state.me.us/dps/cim/crime\\_in\\_maine/cim.htm](http://www.state.me.us/dps/cim/crime_in_maine/cim.htm)

### OUI Arrests, License Suspensions and Convictions

See PHYSICAL AND MENTAL HEALTH section, "Adolescent Health and Safety."

## Teen Pregnancy

### Births to married teenaged mothers as a percent of total live births, 2001

Births are reported by the mother's place of residence at the time of birth.

Source: Maine Department of Human Services, Office of Data, Research and Vital Statistics.

### Births to single teenaged mothers as a percent of total live births, 2001

Births are reported by the mother's place of residence at the time of birth.

Source: Maine Department of Human Services, Office of Data, Research and Vital Statistics.

### Births to unmarried teenaged mothers who have not completed 12 years of school, 1997-2001 annual average

Rate per 1,000 females age 10-19. The data reflect the mother's place of residence at the time of birth. They are averaged over a five-year period to smooth out annual fluctuations.

Source: *Special tabulations by the Maine Department of Human Services, Office of Data, Research and Vital Statistics.*

### Teen pregnancy rate, 2001

Rate per 1,000 females age 10-17. All reported live births, induced abortions and fetal deaths occurring to females age 10 through 17 during the calendar year:

Source: Maine Department of Human Services, Office of Data, Research and Vital Statistics.

### Repeat teen pregnancies as a % of total teen pregnancies, 2001

The percent of females under age 20 who became pregnant during calendar year 2000 who had already been pregnant at least once before in their lives.

Source: *Special tabulations by Maine Department of Human Services, Office of Data, Research and Vital Statistics.*

Photo by Kathy VanGorder

# EDUCATION AND LEARNING

## Children with limited English proficiency attending school, 2002-03

Rate per 1,000 students enrolled in public schools. Children attending public school in Maine who are determined at the start of the school year to be limited in their ability to use English because it is not their native language.

Source: *Data Collection Report on Language Minority Children 2002-03*, Maine Department of Education, Federal Programs and Services Team. <http://www.state.me.us/education/esl/data2003/Survey%20Results%20form%20ESL%20Survey%202002-03.htm>

## High school completion rate, Class of 2002

The percentage of students who graduated from their high school, rather than dropping out of school sometime during their high school years. A separate completion rate is calculated for each graduating class, such as the "Class of 2002."

Calculation of rate is as follows:

Number of graduates in this High School Class / (Number of graduates + number of all dropouts during the 9th, 10th, 11th and 12th grade years of this graduating class).

Source: Maine Department of Education, Division of Management Information. <http://www.state.me.us/education/enroll/grads/grad.htm>

## High school dropouts, 2001-2002

Any person who has withdrawn or been expelled from high school before graduation or completion of a program of studies and who has not enrolled in another educational institution or program. Each local educational unit submits a dropout report to the Department of Education as of the last day of school, counting all students who dropped out during the previous calendar year. This calculation is referred to as an "event" dropout rate. Data represent the 2001-2002 school year and are reported by county for public schools only.

Source: Maine Department of Education, Division of Management Information. <http://www.state.me.us/education/enroll/dropouts/drop.htm>

## High school graduates planning to attend post-secondary school, 2001-2002

High school graduates (including regular diploma, other diploma, or certificate of completion during the previous school year or subsequent summer school) who intend to be or are enrolled full or part time in post-secondary education, according to a survey administered by the local educational unit and submitted in the fall following graduation. The 2001 national rate, referred to as "Immediate Transition to College," reports the percentage of high school completers age 16-24 who were enrolled in any post-secondary education institution the October after completing high school. Because of the difference in age ranges represented by County and State versus National data, please exercise caution in making comparisons.

## Special Education: Individuals with disabilities age 3-21, 2002-2003

The number and percent of students enrolled in schools and individual education programs in Maine who are age 3-21 and have disabilities requiring the provision of special education services during the 2002-2003 school year. The count is taken as of December 1 of the school year and reflects special education enrollment on that one date. The child count is completed by school administrative units, approved state operated/state supported school and Child Development Services sites. Reported as percent of total fall enrollment in public and private schools. National rate represents children age 3-21 during the 2001-2002 school year.

## Children receiving subsidized school lunches, 2003-2004.

The National School Lunch Program is a meal entitlement plan primarily funded through federal dollars. All elementary and junior high schools are required to participate in the program. In Maine, high schools have the option of participating. Children are eligible for free school lunches if their family income does not exceed 130% of the federal poverty level. They are eligible for reduced price school lunches if their family income falls between 130% and 185% of the federal poverty level. Data represent the 2003-2004 school year.

## Child Care and Head Start

### Children served through child care subsidies, SFY 2003.

The number of children served through TANF child care, slots and vouchers during State Fiscal Year 2002 (July 1, 2002 – June 30, 2003). Children up to age 12 are eligible for subsidized child care if their parents are working or in education training, and have incomes at or below 85% of the state median income.

Source: Maine Department of Human Services, Office of Child Care and Head Start.

### Head Start Program, SFY 2003

Total number of state and federally funded children in Head Start program throughout the state of Maine. Head Start provides comprehensive child development and supportive services to low-income preschool children and their families. Eligible children were estimated as the number of children under age 5 in poverty. Unmet need was calculated by subtracting the number of funded children from the estimate of eligible children.

Source: Maine Department of Human Services, Office of Child Care and Head Start.

### Number of licensed child care providers, as of December 2003

Number of child care centers, child care homes and nursery schools licensed in the state of Maine.
